

Cabloc™ Fall Arrest

Cabloc™

The flexible cable system consists of a vertically suspended steel cable that runs the length of the climbing area. The Cabloc™ sleeve connects the worker to the system and automatically follows them during the climb and locks onto the cable in the event of a fall, allowing the worker to regain their footing. The Cabloc™ gear is designed for ease of use, economy and versatility with options available for a variety in width and length of cable lifelines.

Details

- Sleeve for fixed ladder safety system
- For use on solid core cable
- Automatically follows user for hands-free climbing and fall protection
- Easy to install and detach anywhere along lifeline
- Secure locking system stops falls within inches
- Steel carabiner for secure connection to harness
- Extremely rugged and corrosion resistant construction
- Extremely compact, lightweight design
- Sleeve with carabiner fit to solid core cable.
